

Reflect on Educator knowledge to inform Training and Development

Reflect on current resources, learning environment and pedagogy to guide future decisions

Track children's learning data through observations and documentation

Communicate with families to support continuation of learning outside of preschool

Goal: Improve children's ability to use number-related mathematical terminology

Challenge of practice: If we implement a consistent, whole site approach to support children's mathematical knowledge and skills, then we will improve children's ability to use number-related mathematical terminology

Success Criteria: Children are confident to use number-related mathematical terminology correctly. Children are able to identify and share number-related mathematical terminology with their peers, families and educators. Children know where to access tools, materials and resources related to number. Growth in children's data and observations collected. Families are informed about number-related mathematical terminology and further support their children at home.
